

Druck DPI 620 Genii

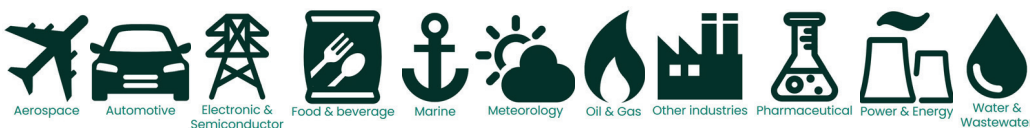

High accuracy pressure, electrical, frequency and temperature multifunction calibrator

The DPI 620 Genii is an ultra-compact Multifunction calibrator with full HART, Foundation Fieldbus and Profibus communications. The DPI 620 Genii provides simultaneous measurement and source capabilities for the setup, testing, and calibration of most types of process instruments including transmitters, transducers, gauges/ indicators, switches, proximity detectors, counters, RTDs, thermocouples and valve positioners. The DPI620G also comes in a hazardous environment model, the intrinsically safe (IS) DPI620G-IS

Features of the DPI 620 Genii include :

- High-resolution touch display and UI (user interface) for clear easy to use and clear display of readings and functions.
- Powerful HART, Profibus and Foundation Fieldbus functions can perform all tasks without the need for an addition communicator.
- ATEX and IECEx approved system for use in zone 1 and 2 classified hazardous areas
- Onboard guided documenting via 4sight2 reducing errors and creating custom and audit ready records of calibration procedures
- Modular pressure measuring and generation options with PM modules and PV bases resulting in the most versatile and complete pressure calibration system on the market.

Ideal applications for the DPI 620 Genii
